

Please note the latest values in

AASHTO M288-96

*recommendations for Geotextile Specifications
for Paving Fabric*

**101 lbs. Grab Tensile Strength
>50% Elongation
Minimum 4.1 oz./square yard**

It is our opinion the review and subsequent change on the part of AASHTO is justified. The resulting change will be inconsequential to project costs but invaluable to system performance. We recommend you review your current specifications and consider this update.
