

How Are You Keeping Your Bottom Dry?

Water is Pavement's Worst Enemy

- Fabric interlayers have a very long and successful waterproofing history in all climates.
- Fabric interlayers are successfully being placed at a rate of over 100 million yards *Every Year!*
- Fabric interlayers reduce surface water from entering and destroying the road base.
- Fabric interlayers increase pavement fatigue life.
- Fabric interlayers reduce reflective cracking.

- Fabric interlayers are 100% recyclable.
